Day 19 Hybrid Notes

Measuring a fraction of a circle | Cloze + outline + active learning

Name:	Date:	Period:

Learning Targets
I can find arc length as a fraction of circumference.
I can find sector area as a fraction of circle area.
I can connect common degree measures to radians.

Part 1: Cloze Notes - Essential Ideas
1. A central angle theta represents the fraction theta over ____________________.
2. Arc length uses a fraction of the circle's ____________________.
3. Sector area uses a fraction of the circle's ____________________.
4. Circumference is ____________________.
5. Circle area is ____________________.
6. A half-turn is 180 degrees or ____________________.
7. A full turn is 360 degrees or ____________________.

Part 2: Outline Notes - Big Picture
A. Arc length measures part of the circle's ____________________.
B. Sector area measures part of the circle's ____________________.
C. Both calculations begin with the same angle ____________________.
D. Radians measure angles using radius and arc ____________________.

Connection to Prior Math
1. What algebra skill shows up today?

____

2. What diagram or graph skill shows up today?

____

3. What is one place this could appear outside math class?

____

Most Important Reminder
Before solving, label the diagram, name the relationship, and check whether the answer makes sense.

Day 19 Hybrid Notes

Guided setup + active learning

Part 3: Guided Setup Practice

1. Find arc length for radius 12 and angle 60 degrees.
   Setup/work: ____
   Answer: ____
2. Find sector area for radius 9 and angle 120 degrees.
   Setup/work: ____
   Answer: ____

Part 4: Error Analysis

A student uses circumference to find sector area.
What went wrong?
____
_
Correct idea:
____
_

Before You Solve Checklist

[ ] I labeled the diagram or graph.
[ ] I chose the correct relationship or formula.
[ ] I substituted values carefully.
[ ] I checked whether my answer makes sense.

Part 5A: Draw It

Draw a diagram, graph, or labeled example that matches today's lesson.

Part 5B: Two-Sentence Summary

Sentence 1: Today I learned that ______________________________.
Sentence 2: One thing I need to remember when solving is ______________________________.

Part 5C: Application Problem

A wheel of radius 14 inches rotates 225 degrees. How far does a point on its rim travel?
Setup: ______________________________
Answer: ______________________________
Sentence answer: ______________________
