Day 17 Hybrid Notes

Using vertex location and intercepted arcs to choose a relationship | Cloze + outline + active learning

Name:	Date:	Period:

Learning Targets
I can distinguish central and inscribed angles.
I can find missing angle and arc measures.
I can explain equal, half, double, and 360-degree relationships.

Part 1: Cloze Notes - Essential Ideas
1. A central angle has its vertex at the __________________.
2. A central angle equals its intercepted __________________.
3. An inscribed angle has its vertex on the __________________.
4. An inscribed angle is half its intercepted __________________.
5. An intercepted arc is twice its inscribed __________________.
6. A semicircle measures __________________.
7. All arcs around a circle total __________________.

Part 2: Outline Notes - Big Picture
A. Vertex location determines the angle __________________.
B. Central angles use an equal __________________.
C. Inscribed angles use a half or double __________________.
D. Angles intercepting the same arc can reveal __________________.

Connection to Prior Math
1. What algebra skill shows up today?

____

2. What diagram or graph skill shows up today?

____

3. What is one place this could appear outside math class?

____

Most Important Reminder
Before solving, label the diagram, name the relationship, and check whether the answer makes sense.

Day 17 Hybrid Notes

Guided setup + active learning

Part 3: Guided Setup Practice

1. A central angle measures 84 degrees. Find its intercepted arc.
   Setup/work: ____
   Answer: ____
2. An inscribed angle intercepts a 124-degree arc. Find the angle.
   Setup/work: ____
   Answer: ____

Part 4: Error Analysis

A student says a 55-degree inscribed angle intercepts a 27.5-degree arc.
What went wrong?
____
Correct idea:
____

Before You Solve Checklist

[ ] I labeled the diagram or graph.
[ ] I chose the correct relationship or formula.
[ ] I substituted values carefully.
[ ] I checked whether my answer makes sense.

Part 5A: Draw It

Draw a diagram, graph, or labeled example that matches today's lesson.

Part 5B: Two-Sentence Summary

Sentence 1: Today I learned that _________________________________.
Sentence 2: One thing I need to remember when solving is _________________________________.

Part 5C: Application Problem

A camera sits on a circular track. Two viewing points on the circle intercept the same 96-degree arc. Find each inscribed viewing angle.
Setup: _________________________________
Answer: _________________________________
Sentence answer: ________________________
