

Day 27 Capstone Work Packet

Geometry Summer Credit | Planning, Calculations, and Presentation

Name:	Date:	Period:
-------	-------	---------

Directions

Use this packet as your working document. Your final presentation should be short, clear, and supported by calculations.

Part A: Project Proposal

1.	Capstone option selected:
2.	Real object, place, design, or situation:
3.	Modeling question:
4.	Known measurements or measurements you need to estimate:
5.	Assumptions:
6.	Units you will use:

Part B: Geometry Work

7.	Draw a labeled diagram or describe what your diagram will show.
----	---

8.	List the formulas you will use and why each one fits the situation.
----	---

9.	Show calculation 1.
----	---------------------

10.	Show calculation 2.
-----	---------------------

11.	Show calculation 3 or a check for reasonableness.
-----	---

12.	State your final answer or decision with units.
-----	---

Day 27 Capstone Work Packet

Continued | Presentation Planner

13.	Slide or board section 1: Modeling question and context.
14.	Slide or board section 2: Diagram and assumptions.
15.	Slide or board section 3: Calculations and units.
16.	Slide or board section 4: Final decision and limitation.
17.	Practice explanation: Write two sentences that explain your result in everyday language.
18.	Peer check: What question did a classmate ask you, and how did you improve your model?
