

Day 25 Quiz

Geometry Summer Credit | Cumulative Quiz Set 1

Name:	Date:	Score:
-------	-------	--------

Directions

Choose the best answer. Show work for short-response items.

- Reflecting (4,-9) across the x-axis gives:
A (-4,-9) B (4,9) C (-4,9) D (9,4)
- A dilation by scale factor 3 makes a figure:
A always congruent B similar but larger C reflected D rotated
- If two similar figures have scale factor 4, their area scale factor is:
A 4 B 8 C 16 D 64
- In a right triangle, tangent uses:
A opposite/hypotenuse B adjacent/hypotenuse C opposite/adjacent D hypotenuse/opposite
- The hypotenuse of a right triangle with legs 5 and 12 is:
A 7 B 13 C 17 D 60
- Triangle ABC is similar to triangle DEF. $AB=6$, $DE=15$, and $BC=10$. Find EF.
- A right triangle has angle 52 degrees and adjacent side 14. Find the hypotenuse to the nearest tenth.

Day 25 Quiz

Continued

8.	A 30-60-90 triangle has short leg 9. Find the hypotenuse and long leg.
----	--

9.	A building casts a 45 ft shadow. The angle of elevation to the sun is 38 degrees. Estimate the building height.
----	---

10.	Error analysis: A student uses sin when the problem gives adjacent and hypotenuse. Explain the error and name the correct trig ratio.
-----	---
