

Day 3 Quiz

Geometry Summer Credit | Transformations

Name:	Date:	Score:
-------	-------	--------

Directions

Choose the best answer for multiple-choice items. Show work for short-response items.

1. Translate (3, -5) by $\langle -4, 9 \rangle$.
A (-1, 4) B (7, -14) C (-4, 9) D (1, -4)

2. Reflect (-6, 2) across the x-axis.
A (6, 2) B (-6, -2) C (6, -2) D (-2, 6)

3. Rotate (4, -7) 180 degrees about the origin.
A (-4, 7) B (7, 4) C (-7, -4) D (4, 7)

4. Dilate (-3, 8) by scale factor 2 from the origin.
A (-1.5, 4) B (6, -16) C (-6, 16) D (-5, 10)

5. Which transformation preserves side lengths and angle measures but changes location?
A dilation by 3 B translation C scale factor $\frac{1}{2}$ D none

6. Error analysis: A student reflects (5, -9) across the y-axis and gets (5, 9). Identify and correct the error.

Day 3 Quiz

Continued

7.	Triangle A(1, 2), B(5, 2), C(3, 6) is translated by $\langle -2, 4 \rangle$. Find A', B', and C'.
----	--

8.	Rotate P(-2, -5) 90 degrees counterclockwise about the origin.
----	--

9.	Spiral review: Find the slope through (-4, 3) and (2, 9).
----	---

10.	Written reasoning: Explain how a dilation is different from a translation, reflection, or rotation.
-----	---
