

Day 16 Exit Slip

Geometry Summer Credit | Circle Equations

Name:	Date:	Score:
-------	-------	--------

Directions

Show how you identified the center and radius. Use standard circle form.

1.	State the center and radius of $(x + 3)^2 + (y - 5)^2 = 16$.
2.	Write the equation of a circle with center $(4, -2)$ and radius 7.
3.	List the four anchor points for a circle centered at $(-1, 2)$ with radius 3.
4.	A student says the radius of $x^2 + y^2 = 121$ is 121. Explain and correct the error.
