

Day 04 Hybrid Notes

Same size, same shape, and triangle relationships | Cloze + outline + active learning

Name:	Date:	Period:
-------	-------	---------

Learning Targets
I can decide whether figures are congruent using rigid motions.
I can classify triangles by sides and angles.
I can use interior and exterior angle relationships in triangles.

Part 1: Cloze Notes - Essential Ideas
1. Congruent figures have the same size and same _____.
2. Rigid motions include translations, rotations, and _____.
3. The interior angles of a triangle add to _____.
4. An exterior angle equals the sum of the two remote _____.
5. An isosceles triangle has at least two congruent _____.
6. An equilateral triangle has three congruent sides and three congruent _____.
7. A right triangle has one angle measuring _____.

Part 2: Outline Notes - Big Picture A. Congruence means one figure can map onto another with _____. B. Triangle classification helps organize _____. C. Angle sums turn diagrams into _____. D. Exterior angles are useful shortcuts for missing _____. _____	Connection to Prior Math 1. What algebra skill shows up today? _____ 2. What diagram or graph skill shows up today? _____ 3. What is one place this could appear outside math class? _____ —
---	--

Most Important Reminder
Before solving, label the diagram, name the relationship, and check whether the answer makes sense.

Day 04 Hybrid Notes

Guided setup + active learning

Part 3: Guided Setup Practice

1. Triangle angles are x , $2x$, and $3x$. Find x .

Setup/work: _____

Answer: _____

2. An exterior angle is 125 degrees and one remote interior angle is 55 degrees. Find the other.

Setup/work: _____

Answer: _____

Part 4: Error Analysis

A student says a triangle with angles 40, 60, and 80 has an exterior angle of 80 at the 40-degree vertex.

What went wrong?

Correct idea:

—

Before You Solve Checklist

☐ I labeled the diagram or graph.

☐ I chose the correct relationship or formula.

☐ I substituted values carefully.

☐ I checked whether my answer makes sense.

Part 5A: Draw It

Draw a diagram, graph, or labeled example that matches today's lesson.

Part 5B: Two-Sentence Summary

Sentence 1: Today I learned that

_____.

Sentence 2: One thing I need to remember when solving is

_____.

Part 5C: Application Problem

A triangular support has two equal base angles of 68 degrees. Find the vertex angle.

Setup: _____

Answer: _____

Sentence answer: _____
