

Day 05 Hybrid Notes

Informal reasoning and missing parts | Cloze + outline + active learning

Name:	Date:	Period:
-------	-------	---------

Learning Targets
I can identify SSS, SAS, ASA, AAS, and HL congruence patterns.
I can use congruent triangles to find missing side lengths and angles.
I can explain why matching parts matter.

Part 1: Cloze Notes - Essential Ideas
1. SSS means three pairs of corresponding sides are _____.
2. SAS means two sides and the included angle are _____.
3. ASA means two angles and the included side are _____.
4. AAS means two angles and a non-included side are _____.
5. HL works only for right triangles with a congruent hypotenuse and _____.
6. Corresponding parts are the parts in the same _____.
7. CPCTC means corresponding parts of congruent triangles are _____.

Part 2: Outline Notes - Big Picture A. Congruence shortcuts help avoid checking every _____. B. The order of letters tells which parts _____. C. After triangles are congruent, matching parts must be _____. D. This prepares students for precise reasoning without formal _____.	Connection to Prior Math 1. What algebra skill shows up today? _____ 2. What diagram or graph skill shows up today? _____ 3. What is one place this could appear outside math class? _____ —
--	--

Most Important Reminder
Before solving, label the diagram, name the relationship, and check whether the answer makes sense.

Day 05 Hybrid Notes

Guided setup + active learning

Part 3: Guided Setup Practice

1. If triangle ABC is congruent to triangle DEF, which side matches BC?

Setup/work: _____

Answer: _____

2. If $AB = 12$ and DE matches AB, what is DE?

Setup/work: _____

Answer: _____

Part 4: Error Analysis

A student uses SSA as a congruence shortcut.

What went wrong?

Correct idea:

—

Before You Solve Checklist

☐ I labeled the diagram or graph.

☐ I chose the correct relationship or formula.

☐ I substituted values carefully.

☐ I checked whether my answer makes sense.

Part 5A: Draw It

Draw a diagram, graph, or labeled example that matches today's lesson.

Part 5B: Two-Sentence Summary

Sentence 1: Today I learned that

_____.

Sentence 2: One thing I need to remember when solving is

_____.

Part 5C: Application Problem

Two triangular brackets are congruent. One has a 38-degree angle corresponding to angle X. Find X.

Setup: _____

Answer: _____

Sentence answer: _____
