

Day 18 Hybrid Notes

Identifying circle configurations and choosing a product rule | Cloze + outline + active learning

Name:	Date:	Period:
-------	-------	---------

Learning Targets
I can distinguish chords, secants, and tangents.
I can use tangent-radius and equal-tangent relationships.
I can select and solve the correct segment-product equation.

Part 1: Cloze Notes - Essential Ideas
1. A chord has both endpoints on the _____.
2. A secant crosses a circle at _____.
3. A tangent touches a circle at exactly _____.
4. A radius is perpendicular to a tangent at the point of _____.
5. Two tangents from the same external point are _____.
6. For two secants outside, multiply external times _____.
7. For a tangent and secant, tangent squared equals external times _____.

Part 2: Outline Notes - Big Picture A. Intersection location helps identify the _____. B. For a secant, whole equals external plus _____. C. Product rules compare powers from the same external _____. D. Negative solutions are rejected because segment lengths are _____.	Connection to Prior Math 1. What algebra skill shows up today? _____ 2. What diagram or graph skill shows up today? _____ 3. What is one place this could appear outside math class? _____ —
--	--

Most Important Reminder
Before solving, label the diagram, name the relationship, and check whether the answer makes sense.

Day 18 Hybrid Notes

Guided setup + active learning

Part 3: Guided Setup Practice

1. Intersecting chord parts are 6 and 8, and 4 and x . Find x .

Setup/work: _____

Answer: _____

2. A tangent is 12; a secant has external 8 and whole x . Find x .

Setup/work: _____

Answer: _____

Part 4: Error Analysis

A student uses external times internal in a two-secant equation.

What went wrong?

Correct idea:

—

Before You Solve Checklist

☐ I labeled the diagram or graph.

☐ I chose the correct relationship or formula.

☐ I substituted values carefully.

☐ I checked whether my answer makes sense.

Part 5A: Draw It

Draw a diagram, graph, or labeled example that matches today's lesson.

Part 5B: Two-Sentence Summary

Sentence 1: Today I learned that

_____.

Sentence 2: One thing I need to remember when solving is

_____.

Part 5C: Application Problem

A walkway tangent to a circular garden has length 8 from point P. A secant from P has external part 4. Find its whole length.

Setup: _____

Answer: _____

Sentence answer: _____
