

Day 18 Quiz

Geometry Summer Credit | Chords, Secants, Tangents, and Segment Relationships

Name:	Date:	Score:
-------	-------	--------

Directions

Choose the best answer. Name the configuration and show work for short-response items.

1.	A radius drawn to a point of tangency forms an angle of: A 45 degrees B 90 degrees C 180 degrees D 360 degrees
2.	Two tangent segments from the same external point are: A complementary B perpendicular C congruent D supplementary
3.	Two chords intersect inside. Their parts are 6 and 10, and 5 and x. Find x. A 3 B 12 C 21 D 60
4.	Two secants share an external point. First: external 4, whole 16. Second: external 8, whole x. Find x. A 2 B 8 C 12 D 32
5.	A tangent and secant share an external point. The secant has external 5 and whole 20. The tangent length is: A 10 B 15 C 25 D 100
6.	Two tangent segments measure $3x+5$ and $5x-11$. Find x and each tangent length.
7.	Intersecting chord parts are $x+2$ and 6, and 8 and 9. Find x.

Day 18 Quiz

Continued

- | | |
|----|--|
| 8. | Two secants share an external point. First has external 3 and internal 9. Second has external 4 and whole x . Find x . |
|----|--|

- | | |
|----|---|
| 9. | A tangent has length 14. A secant has external part 7 and whole length x . Find x . |
|----|---|

- | | |
|-----|--|
| 10. | Spiral review: An inscribed angle intercepts a 132-degree arc. Find the angle. |
|-----|--|

- | | |
|-----|---|
| 11. | Error analysis: A secant has external part 5 and internal part 11. A student uses $5(11)$ in the product. Explain and write the correct factor product. |
