Directions

Show the property or coordinate evidence you used.

1.	A parallelogram has angle A = 63 degrees. Find angle C and angle B.
2.	A rectangle has diagonals $3x + 2$ and 20. Find x.
3.	Find the slope of the segment from (1, 2) to (7, 5).
4.	A quadrilateral has one pair of parallel sides. Is that enough to prove it is a parallelogram? Explain.
