

Day 9 Exit Slip

Geometry Summer Credit | Similarity Applications

Name:	Date:	Score:
-------	-------	--------

Directions

Label the matching quantities and show your proportion.

1.	Triangle ABC is similar to triangle DEF. $AB = 6$, $DE = 24$, $BC = 9$. Find EF.
2.	A 5-foot person casts an 8-foot shadow. A building casts a 56-foot shadow. Find the building height.
3.	A point $(4, -3)$ is dilated to $(12, -9)$. What is the scale factor?
4.	Error analysis: A student writes a proportion before identifying matching sides. Why is that risky?
