

Day 28 Final Readiness Review

Geometry Summer Credit | Mixed Practice Before the Written Final

Name:	Date:	Period:
-------	-------	---------

Directions

Use this as your final review. Name the topic, show setup, and check units.

Part A: Coordinate Geometry, Similarity, and Trig

1.	Find the slope through (3, 8) and (9, 20).
2.	Find the midpoint of (-6, 11) and (8, -3).
3.	Find the distance between (1, -4) and (13, 1).
4.	Reflect A(-7, 5) across the y-axis.
5.	Two similar figures have scale factor 4. The smaller area is 15 square units. Find the larger area.
6.	A right triangle has legs 7 and 24. Find the hypotenuse.
7.	A right triangle has angle 50 degrees and opposite side 11. Find the hypotenuse to the nearest tenth.

Part B: Circles, Measurement, and Modeling

8. Write the equation of a circle with center $(-3, 6)$ and radius 4.

9. A circle has equation $(x - 2)^2 + (y + 7)^2 = 81$. Name the center and radius.

10. A circle has radius 12 and central angle 60 degrees. Find arc length.

11. A circle has radius 8 and central angle 90 degrees. Find sector area.

12. Find the volume of a cylinder with radius 5 and height 9 in terms of π .

13. Find the surface area of a rectangular prism with length 10, width 6, and height 4.

14. A solid has mass 840 g and volume 210 cm^3 . Find its density.

Day 28 Final Readiness Review

Continued | Synthesis

15.	A package can weigh no more than 2000 g. It has volume 300 cm^3 and density 6 g/cm^3 . Does it meet the constraint?
-----	---

16.	Describe the transformation from $x^2 + y^2 = 25$ to $(x + 4)^2 + (y - 1)^2 = 25$.
-----	---

17.	A ramp rises 5 ft over a horizontal distance of 18 ft. Find the angle the ramp makes with the ground to the nearest degree.
-----	---

18.	A wall is 26 ft by 9 ft. Paint covers 300 square feet per gallon. How many gallons are needed for one coat?
-----	---

19.	Reflection: Which final-review problem felt strongest for you, and which one do you want to ask about before the final?
-----	---
