

Day 26 Hybrid Notes

Choosing the right tool before the final stretch | Cloze + outline + active learning

Name:	Date:	Period:
-------	-------	---------

Learning Targets
I can review circles, measurement, coordinate geometry, and modeling.
I can select the correct formula for a mixed problem.
I can use units and context to check whether an answer is reasonable.

- Part 1: Cloze Notes - Essential Ideas**
- 1. A circle equation in center-radius form is $(x-h)^2+(y-k)^2=$ _____.
 - 2. Arc length uses a fraction of _____.
 - 3. Sector area uses a fraction of circle _____.
 - 4. Surface area measures outside covering in _____.
 - 5. Volume measures inside space in _____.
 - 6. Density equals mass divided by _____.
 - 7. A modeling constraint is a limit or requirement a solution must _____.

- Part 2: Outline Notes - Big Picture**
- A. Circle problems often require identifying center, radius, arc, or _____.
 - B. Measurement problems require deciding between area, surface area, and _____.
 - C. Coordinate problems use slope, distance, and midpoint as _____.
 - D. Modeling problems require a calculation and a final _____.

- Connection to Prior Math**
- 1. What algebra skill shows up today?

 - 2. What diagram or graph skill shows up today?

 - 3. What is one place this could appear outside math class?

Most Important Reminder
Before solving, label the diagram, name the relationship, and check whether the answer makes sense.

Day 26 Hybrid Notes

Guided setup + active learning

Part 3: Guided Setup Practice

1. A circle has radius 12 and central angle 150 degrees. Find sector area.

Setup/work: _____

Answer: _____

2. A package has volume 250 cm^3 and density 6 g/cm^3 . It must weigh at most 1800 g. Does it meet the constraint?

Setup/work: _____

Answer: _____

Part 4: Error Analysis

A student uses circumference to find sector area.

What went wrong?

Correct idea:

—

Before You Solve Checklist

☐ I labeled the diagram or graph.

☐ I chose the correct relationship or formula.

☐ I substituted values carefully.

☐ I checked whether my answer makes sense.

Part 5A: Draw It

Draw a diagram, graph, or labeled example that matches today's lesson.

Part 5B: Two-Sentence Summary

Sentence 1: Today I learned that

_____.

Sentence 2: One thing I need to remember when solving is

_____.

Part 5C: Application Problem

A rectangular prism is 8 by 5 by 6. Find surface area and volume.

Setup: _____

Answer: _____

Sentence answer: _____
