

Day 17 Exit Slip

Geometry Summer Credit | Central and Inscribed Angles

Name:	Date:	Score:
-------	-------	--------

Directions

Identify the angle type and intercepted arc relationship before calculating.

1.	Central angle AOB measures 108 degrees. Find minor arc AB.
2.	Inscribed angle ACB intercepts a 108-degree arc AB. Find angle ACB.
3.	An inscribed angle measures 63 degrees. Find its intercepted arc.
4.	Explain how vertex location tells you whether an angle is central or inscribed.
